## Design Document Revision

### Project Overview Changes

- Added a context diagram
  - Before we didn't have a context Diagram included.
- Added the Github Link to the repository
  - Before we didn't have a link to the Github repo included.
- Added the User Stories
  - Before we didn't discuss our user stories but now there is a section that talks about our user stories.

### Subsystem Architecture

- Changed the Diagram to the correct UML package diagram that is wanted.
  - There was a misunderstanding of what was wanted in the original submission so now with a better understanding, the correct sub architecture is included.

### Dynamic View Semantics

- Provided the correct UML Diagram Sequence
  - Changed the design of the UML Diagram to better fit the description of what is required
- Made it more clear to read thus fixing the syntax
  - Changed the flow patterns and arrows making it easier to follow and understand. Improved the rationality of the semantics
